### Educational Trips (2023-24)

Educational excursions are one of the many initiatives taken by the Centre for Research (CFR), along with the Advisory Committee for Professional Grooming (ACPG) of Maitreyi College. Educational tours are considered an essential component of the academic curriculum as students enhance their understanding and knowledge through experiential learning. By participating in trips students develop many skills such as independent learning, creativity, tolerance, empathy, critical thinking, team-work and many more. Students get first hand exposure to various cultures, traditions when they visit historical sites and natural landscapes, and greatly enjoy learning outside their monotonous classroom.

Following is the list of educational trips of various departments of Maitreyi College in the academic year 2023-24 with their destination details:
